Items Discussed and Decisions Made:
- What got done this week
    - Unit test to make sure all animals are entered and if there is information missing was made and complete.
    - The program now has a navbar with 'Home', Full 'Animals' list, and 'Back' buttons that all work appropriately. The program can go from the home -> region listing -> animal information for selected animal appropriately as well as home -> full animal list -> animal information for selected animal. - Rebecca and Zach will work on updating documentation
