Team Zoo Guide Meeting Minutes
Date: 2/26/2021

Attendees: Rebecca Grantland, Sarah Wathke, Suzanne Moore, Zachary Jones, Hritik (Ricky) Pathak – late, Christopher Cotton

Items Discussed and Decisions Made:
- What got done this week?
    - Ricky still working on zoom on select feature. Did not have much time to work on it this past week with other classes.
    - Zach and Rebecca managed to get their slides done for the design review.
- Design Review Prep
    - Sarah, Chris, Ricky, and Suzanne all said they could get their slides done in the next week to review in the next team meeting before the Design Review.
- Database work to work on
    - Database entries need to be started on and hopefully completed in the next 2 weeks. They can be worked on in MySQL workbench if installed (the database file was sent out in group chat earlier this week), or, as suggested by Chris after last weeks meeting, they can be entered into a plain text file and sent to Rebecca to be copied and pasted into the main SQL file. Either way Rebecca should be contacted on what animals to work on before starting to ensure no duplicates are made.
    - The database needs to be connected to the web page in code. The proof of concept was made last week so that can be edited to use the zooGuide database and visuals cleaned up a bit.

Action Items:
- Everyone as available is to work on data entry for the database.
- Sarah, Chris, Ricky, and Suzanne are to all complete their slides Design Review slides before the next meeting.
- Rebecca will work on the database web page if there is time this week. She is currently working on moving so she may not have time till next week.
- Ricky is to work on the zoom feature if he has time after his slide is complete.
